Customer Problem Statement Template:

Create a problem statement to understand the needs and challenges faced by users who want to maintain a healthy lifestyle through proper nutrition. The Customer Problem Statement template helps the team identify real user problems and design a solution that improves meal planning, nutrition tracking, and overall health management.

A well-defined customer problem statement enables the team to better understand users' expectations, dietary challenges, and health goals. It also helps in designing personalized nutrition solutions that improve user experience while supporting dietitians in managing clients more effectively through a secure and user-friendly platform.
