Project Name	Nutrition Assistant
Maximum Marks	4 Marks

Data Flow Diagrams:

A **Data Flow Diagram (DFD)** illustrates how data moves through the **Nutrition Assistant** system. It shows the flow of information between users, dietitians, administrators, and the MongoDB database for meal planning, nutrition tracking, and progress monitoring. The DFD helps in understanding the overall system workflow and data processing.

Example: [\(Simplified\)](#)

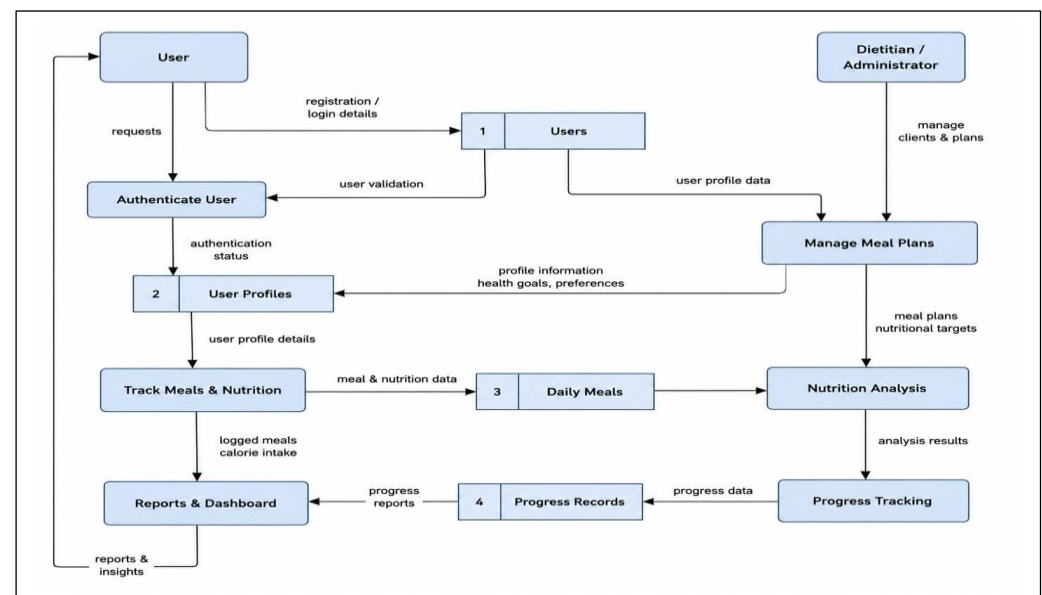

Flow

1. User registers or logs in to the Nutrition Assistant application.
2. User inputs profile details, health data, and meal preferences.
3. System processes the data for meal planning, nutrition analysis, and progress tracking.
4. Processed data is stored in and retrieved from the MongoDB database.
5. Personalized meal plans, nutrition insights, and progress reports are displayed to the user.

User Stories

Example: DFD Level 0 (Industry Standard)

Use the below template to list all the user stories for the product.

User Type	Functional Requirement (Epic)	User Story Number	User Story / Task	Acceptance criteria	Priority	Release
User (Mobile/Web user)	Registration	USN-1	As a user, I can register by entering my name, email, password, age, gender and health details.	I can access my account / dashboard.	High	Sprint-1
		USN-2	As a user, I will receive a confirmation email after successful registration.	I can receive confirmation email and click confirm.	High	Sprint-1
		USN-3	As a user, I can register through Google account.	I can register & access the dashboard using Google.	Medium	Sprint-1
		USN-4	As a user, I can register through Facebook account.	I can register & access the dashboard using Facebook.	Low	Sprint-2
	Login	USN-5	As a user, I can log in to the application by entering email & password.	I can access the dashboard successfully.	High	Sprint-1
	Dashboard	USN-6	As a user, I can view my dashboard with summary of nutrition and progress.	Dashboard data is displayed correctly.	High	Sprint-1
	Profile Management	USN-7	As a user, I can update my personal information, health details and dietary preferences.	Profile is updated successfully.	Medium	Sprint-2
	Meal Plan	USN-8	As a user, I can view personalized meal plans assigned by the dietitian.	Meal plans are displayed correctly.	High	Sprint-2
	Meal Tracking	USN-9	As a user, I can log my daily meals and calorie intake.	Meal data is saved successfully.	High	Sprint-2
	Nutrition Analysis	USN-10	As a user, I can view nutrition analysis and nutrient breakdown.	Nutrition analysis is shown accurately.	Medium	Sprint-3
	Progress Monitoring	USN-11	As a user, I can track my progress towards health goals.	Progress data is displayed correctly.	High	Sprint-3
	Logout	USN-12	As a user, I can securely logout from the application.	User session is ended successfully.	High	Sprint-3
Dietitian (Web user)	Client Management	USN-13	As a dietitian, I can manage clients and view their details.	Client details are displayed correctly.	High	Sprint-2
	Meal Plan Management	USN-14	As a dietitian, I can create and assign meal plans to clients.	Meal plan is assigned successfully.	High	Sprint-2
	Progress Monitoring	USN-15	As a dietitian, I can monitor client progress and update recommendations.	Progress reports are displayed correctly.	High	Sprint-3
Administrator (Web user)	User Management	USN-16	As an administrator, I can manage users and dietitians.	Users and dietitians are managed successfully.	High	Sprint-3
	Reports & Analytics	USN-17	As an administrator, I can view system reports and analytics.	Reports are generated successfully.	Medium	Sprint-3
	System Management	USN-18	As an administrator, I can manage system settings and configurations.	System settings are saved successfully.	Medium	Sprint-3
	Role Management	USN-19	As an administrator, I can manage roles and permissions.	Roles and permissions are updated successfully.	High	Sprint-3
