Problem – Solution Fit Template:

The **Problem–Solution Fit** for the **Nutrition Assistant** project focuses on identifying the nutritional and wellness challenges faced by users and providing a practical digital solution that addresses those needs. The application helps individuals manage personalized nutrition plans, monitor calorie and nutrient intake, track health progress, and receive guidance from dietitians through a secure and user-friendly platform. By understanding users' dietary habits, health goals, and daily challenges, the solution delivers an effective nutrition management system that promotes healthier lifestyles.

Purpose:

- Identify and address common nutritional challenges faced by users through a personalized digital platform.
- Provide users with an efficient way to manage meal plans, calorie intake, and overall health progress.
- Improve healthy eating habits by offering structured nutrition tracking and progress monitoring.
- Support dietitians in creating and managing personalized meal plans for multiple clients.
- Enhance communication between users, dietitians, and administrators through secure role-based access.
- Encourage informed lifestyle decisions by providing nutritional insights and progress reports.
- Improve the overall wellness experience by offering an easy-to-use, responsive, and data-driven nutrition management system.

Template:

Define CS, fit into CC	1. CUSTOMER SEGMENT(S) CS Who is your customer? - Health-conscious individuals - Fitness enthusiasts - People managing weight, diabetes, or lifestyle diseases - Students and working professionals - Dietitians and nutritionists	6. CUSTOMER CONSTRAINTS CC What constraints prevent your customers from taking action or limit their choices of solutions? i.e. spending power, time, knowledge, access to tools, motivation, consistency, etc. - Lack of knowledge about proper nutrition - No time for meal planning and tracking - Difficulty in tracking calories and nutrients - Inconsistent eating habits - Limited access to dietitian guidance - Many apps are complex and hard to use	5. AVAILABLE SOLUTIONS AS Which solutions are available to the customers when they face the problem or need to get the job done? What have they tried in the past? What pros & cons do these solutions have? i.e. pen and paper, generic diet charts, fitness apps, etc. - Generic calorie tracking apps - Online diet charts (PDF/images) - Manual tracking (pen and paper) - Consulting dietitians offline - Pros: Some are free and easy to access - Cons: Lack of personalization, hard to track progress, not integrated	Explore AS, differentiate
	2. JOBS-TO-BE-DONE / PROBLEMS J&P Which jobs-to-be-done (or problems) do you address for your customers? There could be more than one; explore different sides. - Plan personalized meal plans - Track daily calorie and nutrient intake - Monitor weight and health progress - Get professional advice from dietitians - Maintain a healthy lifestyle consistently	9. PROBLEM ROOT CAUSE RC What is the real reason that this problem exists? What is the back story behind the need to do this job? i.e. customers have to do it because of the change in regulations, lifestyle, awareness, environment, etc. - Lack of awareness about balanced nutrition - Busy lifestyle leading to unhealthy eating - No easy way to track and analyze nutrition - Limited access to personalized diet plans - Motivation and consistency are hard to maintain	7. BEHAVIOUR BE What does your customer do to address the problem and get the job done? i.e. directly related: download apps, search online; indirectly associated: skip meals, follow trends. - Search diet and nutrition information online - Use multiple apps or tools for tracking - Follow random diet plans from internet - Skip tracking due to busy schedule - Prefer personalized recommendations - Engage more when progress is visible	
Identify strong TR & EM	3. TRIGGERS TR What triggers customers to act? i.e. seeing their neighbour installing our app, doctor advice, health issues, fitness goals, etc. - Weight gain or health issues - Doctor or dietitian recommendation - Fitness and body goals - Desire to live a healthy lifestyle - Awareness about nutrition	10. YOUR SOLUTION SL If you are working on an existing business, write down your current solution first. If in the canvas, and check how much it fits reality. If you are working on a new business proposition, then keep it blank until you fill in the canvas and come up with a solution that fits within customer limitations, solves a problem and matches customer behaviour. Nutrition Assistant is a MERN stack web application that helps users manage personalized meal plans, track calorie and nutrient intake, monitor health progress, and connect with dietitians through secure role-based dashboards.	8. CHANNELS of BEHAVIOUR CH 8.1 ONLINE What kind of actions do customers take online? Extract online channels from #7 - Web application - Social media (health & fitness communities) - Online dietitian consultation - Health and wellness blogs	Extract online & offline CH of BE
	4. EMOTIONS: BEFORE / AFTER EM How do customers feel when they face a problem or a job and afterwards? i.e. frustrated, confused, unhealthy vs. happy, confident, healthy, in control. Before: - Frustrated, confused, unhealthy, tired After: - Confident, motivated, healthy, in control		8.2 OFFLINE What kind of actions do customers take offline? Extract offline channels from #7 and use them for customer development. - Dietitian clinics and consultations - Gyms and fitness centers - Health camps and workshops - Word of mouth and referrals
